

IMPACT LINE MARKING QUOTES

“Machine and system is brilliant – very happy with our change to Impact.”

Roy Bradbeer, Manager, Serco Winchester, Hampshire

“The Impact machine is a joy to work with. It has made the job of line marking so much easier. It is worth every penny that the school paid for it. This is a must-have machine and with the Impact paint it makes the whole set up a dream. A big thank you to my RT rep and RT for introducing it to me.”

Darren Clark, Head Groundsman, Howe Green School, Bishops Stortford, Herts

“Having retired at 65, I rejoined Gorleston Town Football Club. I wanted to raise the standard of the ground and was looking for a better way of marking out. After speaking to Rigby Taylor, and seeing the machine demonstrated, we purchased an Impact spray marker 9 months ago. Over the past 9 months we have not had a single problem. Everyone remarks on the straight, bright lines. The machine is so easy to use and the cleaning method is even easier, which is a great bonus. I would not hesitate to recommend this machine to my fellow groundsmen.”

John Nicholls, Gorleston Town F.C. Norfolk

“I was a sceptic of spray markers in general at first, however since we purchased an Impact machine in February 2007 I have found it very easy and simple to use and clean. The paint is fantastic; there is no mixing required which eliminates any mess. The quality, brightness and clarity of line it produces is second to none.”

Kevin Newstead, Heartsease High School, Norwich, Norfolk

“I find the Impact Glider and Impact paint gives me a system of line marking that, as well as being very reliable, it gives a superb quality of line with excellent brightness. This system saves my staff time and has proved to be very versatile. It is easily transported, easy to change nozzles to alter the amount of paint applied. This gives the groundsman the choice of presentation he needs i.e. in my case the main pitch is marked with the orange nozzle whilst at the training ground a blue cone nozzle is used. Simply the best system I have used and I have no intention of changing.”

Colin Wheatcroft, Head Groundsman, Plymouth Argyle F.C. Devon

“The best line marker I have used in 10 years. Seven football pitches marked with less than 10 litres of paint. Easy to use and reliable, halving the time it used to take marking the pitches. The machine is cleaned in less than 5 minutes. I would highly recommend this marker.”

Sean Boxall, New Beacons School, Sevenoaks, Kent

“After using chalk line marking powder for almost 30 years on our site, decided to look into the use of line marking paint for the marking of our football pitches. After discussing the options with a few companies, one of which was Rigby Taylor, we opted for their Impact marking paint and 2 new line marking machines. We have found that the job of marking out our pitches has now become a lot easier, the markers easy to operate, light in weight and this has been welcomed by all members of staff. There is no need to premix the paint, which saves time, this also means that the whole operation is now cleaner and faster than before.

The paint gives a bright clean line, which stays bright for a good 2 weeks gives the pitches a professional look. I am very satisfied with the product and would recommend it to anyone who does not already use it.”

David Fisher, Head Groundsman, Vale Royal Borough Council, Winsford, Cheshire
