

Landscape Range

Rose Fertilizer

- 5-2-10 formulation
- An ideal base fertilizer for tree and shrub planting

One hundred percent organic. The analysis is formulated to encourage perfect blooms with good colour.

Recommended application rates: 35-50g per sq.m.

Planting Plus

- 4-12-10 +4%Mg
- High potash fertilizer for excellent blooms
- Contains organic source of nutrition

This fertilizer is ideal for use as a base dressing when planting or containerising trees and shrubs, and also as a top dressing for hardy nursery stock. **Planting Plus** provides Nitrogen and Phosphorus in a slow release form, together with Potash and Magnesium. It also contains Lignite for increased cation exchange capacity in the soil so helping keep the nutrients working together longer.

Recommended application rates: 70-140g per sq.m.

“ We are great believers in the benefits that can be gained through the use of products containing Amino acids. They help the plant to resist stress and we use them in the build up to a match to assist the plant recovery. We use *Microlite Activ8*, supplemented with *Amino-Form LX* and *MicroDyne* through June and July, which is a nutritional combination of micro-granular fertilizers and liquid biostimulants **”**
