

Your favourite Euroflor urban meadow mixes :

RECLAMATION with :

- *Centaurea cyanus*
- *Cosmos* 'Sensation hybrids'
- *Cosmos sulphureus*,
- *Tithonia* 'Torch'
- *Zinnia* 'Lilliput,' 'Sunbow'

Sowing rate 400g = 200 m²

RECLAMATION is a simple mix with relatively few species and cultivars compared to other Euroflor mixes. It is has been formulated to cover large surface areas as cheaply as possible, such as industrial and urban renewal projects, set-aside etc.

Sown at only 2g / m² its flowering period persists until frosts with *Tithonia* shown here below in August, it was followed by pink, red, and white *Cosmos*. A great refuge for many insect species.
