

Jour de Fête

## Agricultural Range

# *Flowering Set-aside and Viti Fleurs®*

Douce France

Alongside the EUROFLOR range, which was developed in response to the needs of local authorities, we have also developed, in partnership with Tézier, an agricultural range. This range responds to agricultural needs.

### *Flowering set aside*

**This mixture is suitable for a big plot of more than one hectare.**

#### *A tall annual mixture* **JOUR DE FÊTE**

This mixture reaches 1 m to 1.50 m, depending on the richness of the soil and the amount of water available. It is interesting for the wild fauna contained within it.

#### *A low annual mixture* **DOUCE FRANCE**

Douce France is a mixture of between 0.50 to 0.80 m.

Mélange Mellifère

#### *A medium height mixture* **MELLIFÈRE**

Bees particularly will be attracted to its nectar and pollen.

Viti Fleurs®

### **VITI FLEURS® mixtures**

This is a low growing mixture which should be positioned between lines of vines or on the turning area. They have many advantages:

- a flower cover limits erosion;
- they encourage life in the soil and attract insects which are good for the vine;
- they offer a refuge for wild fauna;
- they make the vines more attractive.
