## A multi surface biocide for cleaning hard surfaces

BPR-2020-1284

plant origin

BELCHIM
CROP PROTECTION

enclean®

An emulsifiable concentrate (EC) containing 500g/L (51.92% w/w) nonanoic acid.
BPR-2020-1284

- New plant origin active

- Fast acting and reliable results

- Approved for use in organic systems

- Safe to use on a wide range of surfaces

Enclean® is a plant origin biocide that delivers curative algaecidal effects on outdoor buildings and building materials, on all hard surfaces (porous & non porous), in green spaces, and on every roof type (except thatched).
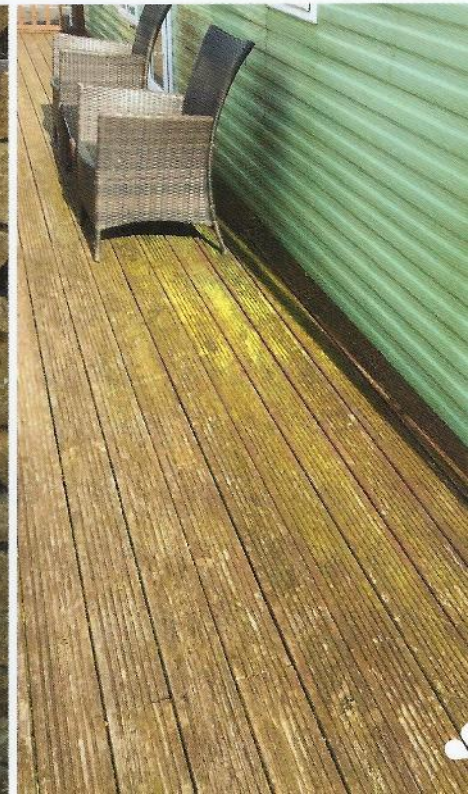

Areas of Use

Enclean® gives fast long lasting results which, in ideal conditions, can be visible a few hours after treatment. Enclean® can be used throughout the year on all approved surfaces. The water required for diluting Enclean® is very much lower than many biocidal treatments, making Enclean® easy to use and a cost effective option. After dilution, 1 litre of Enclean® will cover 550m^2. Enclean® has no re-entry restrictions on the label and is approved for use in organic systems.

| Untreated | A few hours after treatment | 1 month after treatment |

Examples of where to use Enclean®

- Walkways/steps
- Buildings
- Sports surfaces
- Signage
- Fencing (wooden/metal)

- Decking (wooden/composite)
- Furniture (wooden/recycled)
- Play equipment
- Statues/monuments
- Roofing (except thatched)

Recommendations for use

- Mix well before use and agitate during application
- The method of application is spraying at a low pressure of 3 bar or below
- Care must be taken to avoid spray drift onto neighbouring crops or plants
- Do not use in rainy weather or on frozen surfaces. Do not clean the surface after treatment and allow the product to take effect for several days.
- Wash out equipment thoroughly after use

365 days
