

SPRING & AUTUMN SOWING

Boulevard

- ✿ Promotes roadside bio-diversity, with a high percentage of perennial and self-seeding annuals for longevity
- ✿ Low height mix that eliminates the need for roadside verge mowing
- ✿ 100% native and naturalised flora as defined by the Online Atlas of British & Irish Flora

Euroflor Boulevard is a low growing roadside mix of UK native and naturalised species that doesn't grow tall enough to hinder site lines and requires minimum maintenance. The mix includes predominantly perennial species together with self-seeding annuals. The aim is to provide a diverse plant base with habitat specific plants that act as nursery plants for the different biotopes on roadside verges. Individual species will find their own ecological niche to develop and flourish on different soil types, from dry sunny slopes to wet ditches, surviving the shade of over hanging trees or tolerating roadside salt toxicity. It includes rarities not commonly found in wildflower mixes.

Boulevard Characteristics

Pack size: 1 kg
Sowing rate: 3-3.5g/sq. m
Pack coverage: 286-333 sq.m

20 SPECIES

Including Self-Heal, Harebell, Cowslip, Pasque Flower, Evergreen Candytuft, Birds Foot Trefoil, White Clover
