

Classic

- ✿ A diverse mix of 33 naturalised and horticultural species
- ✿ Creates a more natural looking flower meadow
- ✿ Perfect for intermediate zones bringing the countryside and urban areas together

For a more natural looking flower meadow without the usual sparseness of 100% indigenous species, **Classic** combines the advantage of naturalised species and horticultural garden flowers. It is particularly useful in intermediate zones between the countryside and urban areas... a roadside verge on the outskirts of a town or village or in a natural looking public park are good examples

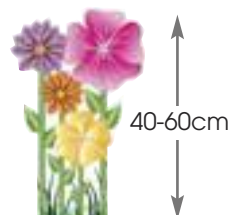

Classic Characteristics

Pack size: 1 kg
Sowing rate: 4.5g/sq. m
