

Dry

- ❖ Perfect for dry sites and impoverished soils
- ❖ Long flowering, diverse, drought tolerant mix
- ❖ Bright colours

Whilst all plants require water, Euroflor Dry has better tolerance to dry conditions and impoverished soils, typical of roadside embankments and industrial wasteland. *Layia platyglossa*, native to southern California and *Dimorphotheca sinuata*, growing in the sandy deserts of Namibia are just two examples of the mixture's diversity and performance.

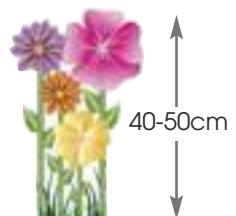

Dry Characteristics

Pack size: 1 kg
 Sowing rate: 2.5-3.5g/sq. m
 Pack coverage: 286-400 sq.m

13 SPECIES
Including Cornflower, Cosmos, Cape Marigold, Blanket Flower, Tidy Tips, Flax
