

SPRING SOWING

# Sarah Bouquet

- ✿ Over 30 plants species for increased biodiversity
- ✿ A spectacular result
- ✿ Supporting bees, butterflies and other insects throughout the season

**Sarah Bouquet** evolved through trials to produce a “fail safe” mix with the aim of achieving maximum diversity whilst avoiding a dominance of bright colours. The results are spectacular, with the species and varieties successfully cohabiting to give a flower performance in autumn as showy as the early/mid summer flowers.

**Sarah Bouquet** has great appeal for public displays, enabling those who want close access to the flowers to see in detail the diversity of what is growing. The extra biodiversity means that not only more flower species but also bees, butterflies and other insects to admire throughout the season.

## Sarah Bouquet Characteristics

Pack size: 1 kg  
Sowing rate: 2.5-3.5g/sq. m  
Pack coverage: 286-400 sq.m

### 30 SPECIES
