

SPRING SOWING

Super Blue Bee

- ✿ Four most attractive species for honey bees and bumble bees
- ✿ Attractive all-blue flowering species
- ✿ Cornflower produces pinkish-white honey

Super Blue Bee combines the four most attractive flower species to honey and bumble bees in one simple mix, providing an enriched nectar and pollen source. This special mixture, in addition to it being visually stunning, is ideal for those with an interest in beekeeping or bee conservation. Shades in the blue colour spectrum are widely acknowledged as a primary attraction to bee species, making this special mixture an elemental choice to help conserve our major pollinators.

Cornflower

Vipers Bugloss

Borage

Purple Tansy
