

NEW

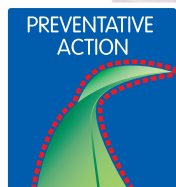

ExterisTM Stressgard[®]

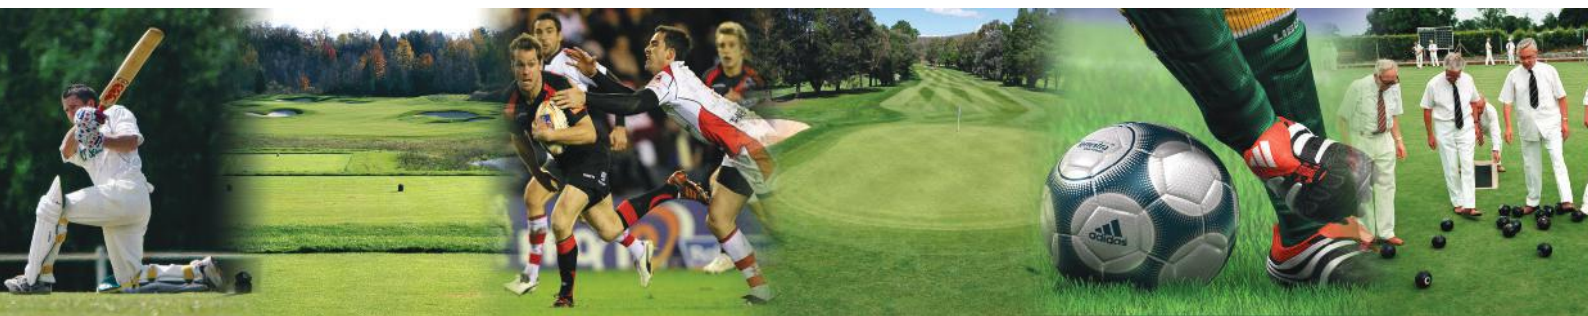

Available now from Rigby Taylor Ltd, the first new chemical group to be launched into the UK turf fungicide market for 10 years.

Expertly engineered to target **Microdochium Patch** and **Dollar Spot**, Exteris Stressgard delivers first class disease management and proven health benefits.

A new addition for integrated and disease resistance management programmes, that has an extensive range of applications on golf greens, tees and fairways, sports grounds, cricket pitches and bowling greens

 <p>LIQUID FORMULATION</p>	 <p>PREVENTATIVE ACTION</p>	 <p>CURATIVE ACTION</p>
 <p>STRESS RELIEF</p>	 <p>UV ABSORBER</p>	 <p>TANK MIXABLE</p>

How does it work?

The new active ingredient in Exteris Stressgard is fluopyram, which is commonly referred to as an Acropetal Penetrant that can penetrate plants through the roots, shoots and leaves. They form a protective barrier on the plant, permeate into the plant and move upwards (acropetally) in the xylem.

Combined with the Stressgard formulation technology, a unique combination of active ingredients and turf specific co-formulants, all combine to provide optimal performance under a range of turf disease stress conditions

Precision disease management

Preventative applications provide protection for the plant before disease occurs. By selecting the right fungicide in advance, fungicidal longevity can be maximized by applying an appropriate product at the time when it can be most effective. The result when applying Exteris Stressgard will be an upgrade in product performance, leading to superior disease management and visibly healthier turf.

What are the benefits?

- › Excellent control of Fusarium Patch and Dollar Spot
- › Outstanding curative and protective activity
- › Enhanced turf quality and plant health benefits
- › Effective under cool growing conditions
- › Improved turf colour – reduced damage from UV radiation
- › Dew mitigation and quick drying time
- › Flexible water volume rates

Contains:	Fluopyram 12.5 g/l /Trifloxystrobin 12.5 g/l
Application rate:	10 litres/ha
Water volume:	200-600 litres/ha
Pack size:	5 litres
Pack coverage:	5,000 sq.m
Recommended period of use:	All year round
