

# Icade

A **selective herbicide** for effective control of Japanese knotweed, hogweed, marestail, docks, nettles, thistles, ragwort and other tough weeds in amenity grassland

## WHY ICADE

- › Effective against tough and invasive weeds
- › Rainfast in 1 hour
- › Safe to grasses
- › Virtually no odour
- › Controls a wide range of woody weeds

## How Icade works

Icade is a new and unique herbicide that will provide effective control against difficult to control and pernicious weeds such as Japanese knotweed, hogweed, rosebay willow herb and brambles. In a programme Icade has also shown good control of marestail and horsetail. It's low odour makes it an ideal product to use in areas where public alarm may be generated by smells commonly associated with herbicide application. Rainfast in 1 hour, for total weed control can be tank mixed with glyphosate.

Icade is quickly transported throughout the target weed and is ideal for weed control in such areas as railway and motorway embankments, industrial areas, under powerlines, in cemeteries, utility areas and around groundsmen and greenkeeper sheds.

### Product Detail

Contains: 12 g/litre aminopyralid and 120 g/litre of triclopyr

MAPP No: 19069

Pack size: 1 litre

Pack coverage: Spot treatment

RT order code: 0434105/01

#### APPLICATION RATES

Equipment	Icade	Water Volume	Area
Knapsack Sprayer	15-20ml	1 litre	50m <sup>2</sup>
		Medium quality spray	

#### RECOMMENDED PERIOD OF USE

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
