

Junction

Selective herbicide specially formulated for contractors for control of weeds in sports, amenity turf and amenity grassland

WHY JUNCTION

- › Unique micro-emulsion technology increases herbicidal activity
- › Controls a wide range of common turf weeds
- › Can be used on new grass only two months after sowing

Area treated by 1 litre (m²)

How Junction works

JUNCTION* TURF HERBICIDE uses the power of florasulam to reduce the overall amount of active ingredient applied as required by the Sustainable Use Directive (SUD). This not only minimises the active loading on the environment, but also reduces the amount of product needed to be carried to a job. The florasulam is combined with a low rate of 2,4-D, which broadens the weed spectrum of Junction.

Junction has been cleverly formulated as a suspo-emulsion in water, allowing it to be applied in 100 litres water per hectare. This markedly reduces the time needed to complete a spray operation. Junction can be applied after only 2 months to spring or summer sown turf. In addition, reseedling can be carried out just 4 weeks after application.

Turn right for more efficient weed control!

Product Detail

Contains: Florasulam and 2,4-D
 MAPP No: 12493
 Pack size: 5 litres
 Pack coverage: 41,667m²
 RT order code: 0423400/05

APPLICATION RATES			
Equipment	Junction	Water Volume	Area
Power Sprayer	1.2 litres	100-400 litres	1ha
Knapsack Sprayer	12ml	10 litres	100m ²

RECOMMENDED PERIOD OF USE											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
			X	X	X	X	X	X			

Use plant protection products safely. Always read the label and product information before use.
