- › Efficient uptake gives good long-term weed control
- › Can plant or cultivate from 24 hours after application for annual weeds, and 5 days for perennial weeds

Aktiv against grasses and bracken

How Mascot Hi-Aktiv Amenity works

Mascot Hi-Aktiv Amenity is the first non-irritant, high concentration glyphosate in Europe with full surfactant loading. This BEAT technology combines new standards of performance whilst being more environmentally friendly than other more traditional formulations.

Mascot Hi-Aktiv Amenity can be used in a variety of situations including around buildings, industrial sites, on pavements, public paths and roadway verges and for site preparation. Can also be applied at low water volumes. It can be used in land preparation for planting, for cleaning-up around trees, for cut stump application and by stem injection.

Hi-Aktiv Amenity can also be used to control a variety of aquatic weed species – waterside weeds, emergent weeds (including Reeds, Rushes, Sedges, Grasses and Watercress) and floating weeds (White Water-lily and Yellow Water-lily).
