

LINE MARKING

Total Line Marking Solutions

Clear, accurate line marking is essential for both presentation and playability. Origin Amenity Solutions offers a range of high quality paints and application equipment, including advanced GPS line marking robots, delivering consistent, high-quality results across all sports surfaces from grassroots to elite facilities.

Origin Amenity Solutions offers one of the most comprehensive line marking ranges in the UK, operating nationwide across the UK and Ireland. Our dedicated area managers provide expert local support and reliable service.

All paints and pedestrian machines are manufactured within the Origin Group, ensuring consistently high-quality products and dependable results. We are a leading provider of GPS line marking technology and the sole UK distributor of TinyMobileRobots.

Our extensive product range suits all budgets and project requirements. The continued growth of our Line Marking team allows us to offer enhanced services, including sales and technical support, machine demonstrations, product training and robot servicing.

Why choose Origin Amenity Solutions?

- ✓ Machine servicing and expert customer support for pedestrian and robot line markers
- ✓ High-quality line marking paints
- ✓ Demonstrations, advice and product training
- ✓ External contracting services

Impact Ready-to-use Paints

An award-winning range of ready-to-use paints, designed with cost-savings, convenience and conservation in mind.

Introduced more than two decades ago, Impact ready-to-use paint system began a revolution in line marking paint and spray machinery technology.

The multi-award winning Impact paint system delivers unbeatable bright, crisp lines combined with significant cost saving benefits. Our Impact paint system is capable of marking up to nine standard sized football pitches from a single 10 litre drum. No added water is required, just shake the drum thoroughly before use.

Water and transport cost saving solutions are increasingly in demand as care for the environment and fuel efficiency become higher priorities. Specially engineered cone nozzles developed specifically for the Impact system enable a full sized football pitch to be over-marked typically with just 1.1 to 1.5 litres of product, depending on nozzle selection.

Using as little as 1.1 litres of Impact paint to over-mark a standard sized football pitch means significantly reduced travel frequency for multi-site marking, thus minimising harmful CO2 and particulate diesel emissions. 5 litre Eco-Bags, introduced for ease of storage and disposal are available with Impact XP, meaning 3 x 5 litre bags loaded onto an iGO system spray machine can mark up to 18 pitches without re-loading.

These benefits position the Impact range as a leading paint solution for the line marking industry in terms of practicality, efficiency, associated costs and environmental stewardship, as well as delivering reliable quality lines. Used by professionals and volunteers alike, the range of products provides the affordability and flexibility to suit all budgets and standard of lines.

Why choose Impact Paints?

- ✓ **Ready-to-use:** No measuring, no mixing, no mess
- ✓ **Time saving:** Quick start, fewer re-fills, faster finish
- ✓ **Cost savings per pitch:** Less paint, no added water, reduced labour
- ✓ **Great visuals:** Crisp lines, bright white or vibrant colours
- ✓ **Fast drying:** Rainfast in as little as 20 minutes
- ✓ **Long lasting:** Highly rain resistant once dry, no 'ghosting'
- ✓ **Flowability:** High atomisation through unique nozzles
- ✓ **Flexibility:** All surfaces – natural grass, hard and synthetic surfaces*
- ✓ **Lighter load:** No heavy tank of dilutable to cause compaction
- ✓ **Bespoke colours:** Colour matching available on request

Impact Pro

Suitable for frequent marking, producing high quality white lines

Order Codes	10L: OAI009460 5L: OAI009459 2 x 5L Eco Bags: OAI009461
Surface	Natural grass

Product Selection

If you have previously used the Impact range, the comparison diagram below will help you choose the nearest product to the one you have used before.

Old Range	New Range
Impact Lite	
Impact	Impact Pro
Impact GR	Impact Premium
Impact XP/HD	Impact Elite

Impact Cone Nozzle Technology

Only the combination of Impact cone nozzles with Impact paints consistently deliver as little as 1.5 litres of paint per pitch. That's because Impact paints are formulated with superior flowability to assist the right droplet atomisation through these unique, specially engineered nozzles. Excellent line coverage and consistent line width can be easily achieved, time after time. Use Flush Thru to keep nozzles and pipes clean and free flowing for optimum delivery and unbeatable lines.

Duraline Marking Paints

A comprehensive range of ready-to-use and traditional dilutable concentrate line marking paints.

The extensive Duraline range has been a trusted choice in the line marking industry for traditional dilutable paints for many years. Duraline Paints are versatile, with different paints available for grass, synthetic and hard surfaces. With a choice of paint colours, the Duraline range is guaranteed to create long lasting and clean lines.

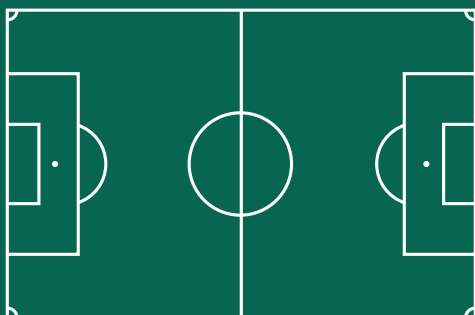

The Duraline range also offers aerosol paints which are highly pigmented and undiluted to produce striking results in a matter of minutes. The Aerosol Paints are environmentally friendly, hardwearing and less wasteful by having a minimum overspray.

Other line marking options within the Duraline range include Duraline White Powders that can be used with a transfer wheel marker to easily control how a ground is marked. These powders are cost effective and easy to apply, especially during the wetter months, where a full size football pitch can be marked with only 44kgs of product.

A range of colours are available in Paint Colourants. These come in 5 litre packs and have a formula that guarantees easy dispersal.

Why choose Duraline Paints?

- ✓ **Dilutable**
- ✓ **Cost-effective:** Suitable for all budgets
- ✓ **Easy-to-use:** Simple mixing process
- ✓ **Suitable for a range of projects:** Paints available for grass, synthetic and hard surfaces
- ✓ **Range of colours**
- ✓ **Great results:** Long lasting, precise lines

Mark your football pitch with only 12 litres of mixed Duraline paint

Duraline Dilutable Concentrate Paints

Duraline Ultimate

Outstanding long-lasting whiteness

Order Code	OAI001308
Pack Size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel
Dilution	5:1 Initial marking 12:1 Overmarking
Colour	●

Duraline Ultra

High pigmented, durable lines with easy mixing hyper-dispersant

Order Code	OAI001305
Pack Size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel
Dilution	3:1 Initial marking 10:1 Overmarking
Colour	●

Duraline Super

High quality pigments with excellent water resistance

Order Code	OAI001295 (white)
Pack Size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel
Dilution	3:1 Initial marking 7:1 Overmarking
Colours*	● ● ● ● ● ● ●

*Available on request

Duraline Sport

Crisp, bright lines with anti-clogging additive for initial marking and overmarking

Order Code	OAI001291
Pack Size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel, brush, roller
Dilution	2:1 Initial marking 4:1 Overmarking
Colour	●

Duraline Aerosol Paints

- ✓ Environmentally friendly, xylene and CFC-free aerosols
- ✓ Highly pigmented, undiluted paint
- ✓ Minimum overspray/waste
- ✓ Convenient, hardwearing and easy to use
- ✓ Dependable aerosol can action

Order Code	● OAI001417 ● OAI001421 ● OAI001418 ● OAI001419 ● OAI001420 ● OAI001422 ● OAI001423
Pack Size	750ml aerosol can
Surface	Range of surfaces including grass
Application Method	Hand-held aerosol or through dedicated aerosol line marking machines

Duraline Transfer Wheel Paints

Duraline Vivid

Simple to use, excellent spray-ability producing a vibrant marking

Special order only

Order Code	OAI001311
Pack Size	10L drum
Surface	Natural grass
Application Method	Transfer wheel
Dilution	Not required, can be diluted up to 10%
Colour	●

Duraline Transfer

Cost-effective transfer wheel paint for vibrant markings

Order Code	OAI001288
Pack Size	10L drum
Surface	Natural grass
Application Method	Transfer wheel
Dilution	Not required
Colour	●

Cleaners

Duraline Flush-Thru

Keeps nozzles and pipes clear as well as roller wheels rolling in all machines

Order Code	OAI001316
Pack Size	10L drum

Hard Surface & Synthetic Surface Paints

Impact Hard Surface

A highly effective, acrylic-based paint for use on non-grass surfaces

Order Code	OAI001328 (white)
Pack Size	5L drum
Surface	Tarmac, concrete
Application Method	RTU with iGO, iGO mini, Glider
Colours*	● ● ● ● ● ● ●

*Available on request

Duraline Hard Surface

Acrylic formulation paint, durable and long lasting

Order Code	OAI001399 (white)
Pack Size	10L drum
Surface	Tarmac, concrete, all-weather hard court
Application Method	Spray, brush/roller
Dilution	Not required

*Available on request

Duraline Synthetic Grass

Acrylic based, anti-scoff formulation producing radiant colour

Order Code	OAI001325 (white)
Pack Size	10L drum
Surface	Synthetic grass
Application Method	Spray
Dilution	Not required
Colours*	● ● ● ● ● ● ●

*Available on request

Speciality Line Marking Paints

Impact Green-Out

Masks out white lines where required, blending with the grass surface

Order Code	OAI001334
Pack size	10L drum
Surface	Natural grass
Application Method	RTU with iGO, iGO mini, Glider, GPS
Colour	

Duraline Green-Out

Provides natural grass colour, covering white lines and stencilled areas

Order Code	OAI001346 (white)
Pack size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel
Dilution	Up to 5:1
Colour	

Duraline Wipe-Out G

Removeable paint system for grass surfaces

Order Code	OAI001344 (white)
Pack size	10L drum
Surface	Natural grass
Application Method	Spray, transfer wheel, brush, roller
Dilution	Up to 1:1, maximum, 10% for transfer wheel
Colours*	

*Available on request

Duraline Wipe-Out S

Removeable paint system for synthetic surfaces

Order Code	OAI001353 (white)
Pack size	10L drum
Surface	Outdoor synthetic grass
Application Method	Spray
Dilution	Not required
Colours*	

*Available on request

Dissolving Solution

Dissolving solution for Wipe-Out paints

Order Code	OAI001360
Pack size	10L drum
Surface	Synthetic surfaces only
Application Method	Spray
Dilution	2:1

Paint Colourants

A range of concentrated colours, available in 5 litre packs.

TinyMobileRobots

High-precision, reliable outdoor robots that perform precision marking and stake out. Sports line marking has never been easier.

TINY
MOBILE
ROBOTS

Why choose robotic line marking?

- ✓ **No more strings and measuring by hand:** Initial markings are just like re-markings
- ✓ **High accuracy and quality**
- ✓ **100% autonomous GPS line marking robot to free up time for grounds staff**
- ✓ **200+ pitch templates which can be scaled/modified**
- ✓ **Works day and night, even in rough weather**
- ✓ **Payback often within year one of operation**
- ✓ **Fast, accurate and repeatable line markings every time**

Initial Marking Times

Football Pitch: 20 minutes

Rugby Union Pitch: 30 minutes

400m Athletics Running Track: 105 minutes

The TinyLineMarker App

Pitches

- Place your pitches directly on background map
- Drag, resize, copy, customise and save
- All your pitch layouts are stored online, ready to be repainted next season
- Cloud storage for safety, sharing and log history of your fields

Software features

- Paint a large-scale custom logo on your turf – simply copy your logo to the tablet and press start
- Select multiple pitches at once
- Get a notification on your tablet when your line marker is no longer applying paint
- Control every single line of your pitch and the robot's driving path directly from the tablet, with advanced edit mode

Controlling robot

- Adjust pitch settings and robot settings directly from tablet for best results
- Run test drives before painting your pitches
- Manual and automatic mode

TinyLineMarker Sport

A compact, GPS-guided, line marking robot, ideal for sports teams, clubs and schools

The TinyLineMarker Sport delivers fast, accurate and repeatable line marking using advanced autonomous technology, saving valuable time for grounds staff. Compact and lightweight, it can be lifted into a standard car by one person for easy transport. Its robust design includes front and side bumpers with intelligent ultrasonic sensors to detect obstacles and prevent damage.

Powered by a brushless electric motor, it offers low energy consumption and zero emissions, making it an environmentally friendly choice. Comprehensive training, after-sales support and flexible payment options are included.

Order Code: OAI002777

Specifications	
Weight	25kg
Dimensions h x l x w	465mm x 710mm x 525mm
Wheels	Lightweight sport wheels 190mm diameter (7.5")
Line widths	5cm – 10cm (2" – 4")
Movement sensors	Ultrasonic side and front bumpers
Battery type	Lithium-ion 400wh (UK charger included)
Battery performance	Spraying time 4 – 5 hours from a single charge
Paint capacity	10L (Impact Ready-to-use)
Marking speed	4kph (1.1mt/s)
Delivery	Shipped directly within two weeks
Pitch templates	Basic templates + 1 collection of templates of your choosing included (e.g. football); others can be purchased

TinyLineMarker Pro X

A versatile, GPS-guided, line marking robot, ideal for councils, contractors and larger universities

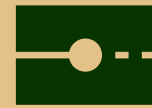

The TinyLineMarker Pro X uses advanced autonomous technology to deliver fast, accurate and repeatable line marking, saving valuable time for grounds staff. Built for powerful performance, its robust design and large high-traction wheels allow it to mark any size pitch, or multiple pitches, with ease. Powered by a brushless electric motor, it offers low energy consumption and zero emissions, making it an environmentally friendly choice, especially when used with Impact ready-to-use paint. Comprehensive training, after-sales support and flexible payment options are included.

Order Code: OAI002727

Specifications	
Weight	35kg
Dimensions h x l x w	720mm x 920mm x 740mm (28" x 36" x 29")
Wheels	Large Pro X wheels for high traction on any surface
Line widths	5cm – 10cm (2" – 4")
Movement sensors	-
Battery type	Lithium-ion 640wh (UK charger included)
Battery performance	Spraying time 5 hours from a single charge
Paint capacity	10L (Impact Ready-to-use)
Marking speed	4kph (1.1mt/s)
Delivery	Shipped directly within two weeks
Pitch templates	All pitch templates included

TinyManager

Track all your autonomous line marking activities

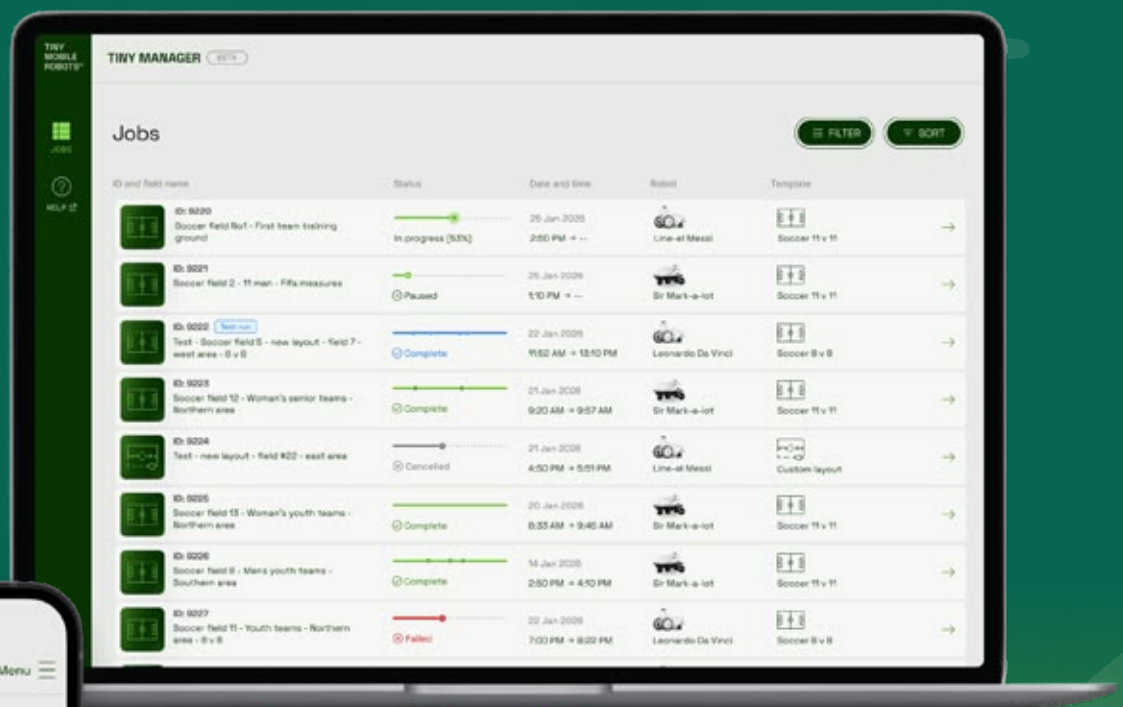

TINY
MOBILE
ROBOTS

The first platform that transforms your robot data into the insights you need.

- Insights on all robot activity
- Find answers instantly with powerful filtering
- Easy documentation with a few clicks

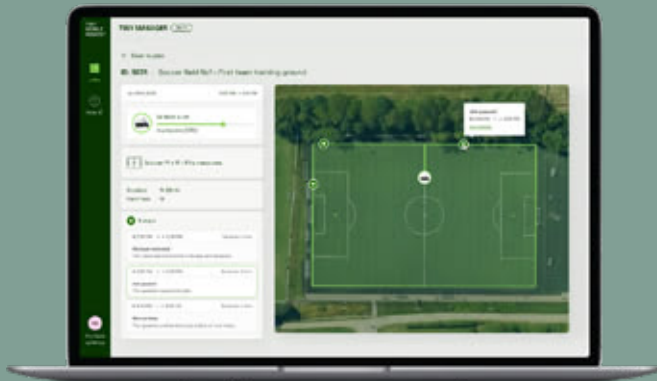

TinyManager
comes **free** with
every robot

Get access
on your PC or
mobile device

The Only Platform Built for Automated Line Marking Robots

TinyManager is the first digital platform designed specifically for managing autonomous line marking at scale. No one else in this industry offers anything like it.

Insights on all robot activity

Click any job to see the full story on a satellite map with painted lines overlaid on your field.

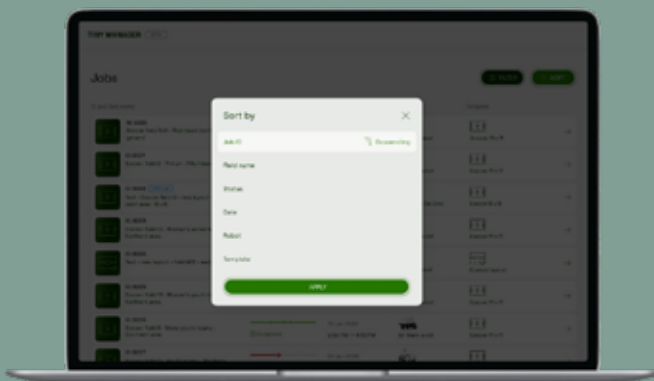

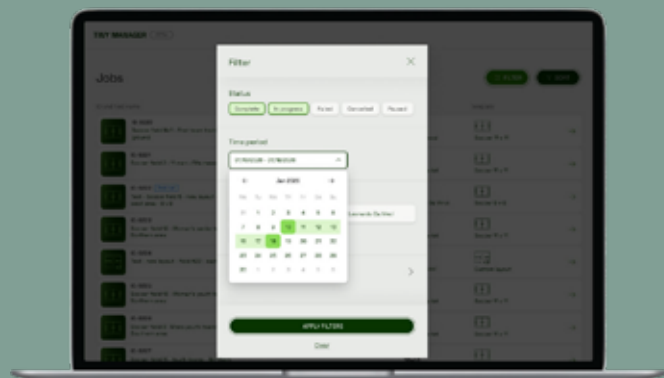

Monitor from your desk or out in the field.

- ✓ See precisely where your robot painted, paused, and stopped
- ✓ View the reason for every pause or failure
- ✓ Watch active jobs update in near-real time
- ✓ Activity logs become operational intelligence

Find answers instantly with powerful filtering

"Show me all football pitches painted by Robot 3 in the last two weeks."

- ✓ Filter by status, robot, template, date range, or location

Easy documentation with a few clicks

Save hours compiling spreadsheets. Demonstrate service levels with actual data rather than estimates.

- ✓ Budget reviews, quarterly reports, service level documentation, contract renewals, performance data, internal reporting

iGo Line Marking Machines

A complete range of technically advanced spray markers plus transfer wheel and aerosol markers.

iGo Prime

The perfect partner for Impact ready-to-use paints

- High Pressure, pump delivery system with priming function
- Finger tip on/off solenoid valve and ski for precision
- Handle Located, disc lift mechanism for ease of operation
- Pre-drilled spacer holes for easy and quick line width changes
- Pneumatic tyres and non-corrosion chassis
- Carries 2x10L drums for 3x5L eco bags
- Long life removeable battery, LED charge indicator and battery life indicator
- Optional 18 litre paint pod for applying dilutable concentrates

Order Code: OAI001494

iGo Premier

A beautifully balanced four-wheeled line marking machine with a host of additional features

- Perfectly balanced and weighted machine for utmost accuracy
- Clear forward sight of line to aid precision marking
- Circulatory paint system for constant flow and easier cleaning
- Ergonomic design with a choice of handle bars
- Optional solenoid – solenoid valve provides instant paint cut-off
- Pre-drilled line widths from 2" (5.08cm) to 4.7" (12cm)
- Pneumatic tyres provide excellent stability and manoeuvrability
- Designed for Impact Match ready-to-use paint and cone nozzle technology

Order Codes: OAI001490 with solenoid, OAI001492 without solenoid

iGo Glider Lite

Robust marker for Impact ready-to-use paints

- Available with paint pod for Impact ready-to-use paints or paint tank for dilutable concentrates
- Perfectly balanced for ease of movement over a range of surfaces
- Adjustable handles to suit operator preferences
- Powerful, high-pressure pump for consistent paint flow
- Long-life removable battery, LED and battery life charge indicators
- Pneumatic tyres and galvanised chassis

Order Code: OAI009390

iGo Mini

New twin probe, circulating system for internal paint distribution

- Six hours constant spraying time from powerful 20 amp power unit
- Pre-drilled disc spacers for quick and easy line width changes
- Fully adjustable handle-bar height to suit operator preferences
- Pneumatic tyres for excellent surface stability and manoeuvrability
- Robust, high-gloss warm touch powder coated framework
- Compact, easily portable and highly manoeuvrable

Order Code: OAI001517

Transfer Wheel Markers

Dimple

- Interchangeable 5cm and 8cm marking wheels
- Available also as a 10cm model
- Choice of standard rubber pneumatic-tyre wheels
- Tank capacity of 16 litres
- Marks out approximately two football pitches with one filling

Order Code: OAI001445

Linesman

- Ideal for use on smaller grounds and tennis courts
- Interchangeable 5 and 8cm marking wheels
- Choice of tank capacity 9 and 14 litres
- Available with a 10 cm marking wheel on the 3 gallon model
- Optional pneumatic-tyres

Order Code: OAI001453

Accessories

iGO 3 Lane Athletics Track Marker

Specially developed for use with the iGO Advance or Glider spray marking machines. Can be used on grass or hard surfaces.

- Mark three lines (two track lanes) in one pass
- Paint applied with either flat fan or cone nozzles
- Adjustable width marker discs
- Sturdy yet lightweight frame
- Pneumatic tyres for effortless and smooth movement
- Easy to attach and remove
- For use with Impact ready-to-use hard surface paint or Duraline dilutable concentrate paint

Order Code: OAI001482

iGO Spray Boom

Converts iGO line marker to a walk behind pedestrian herbicide sprayer. One machine, two functions! Ideal for small sports clubs with one or two pitches, tennis clubs, cricket clubs and golf courses.

- Three nozzle, 1.7 metre boom width
- Heavy duty pump applies consistent spray
- Calibrate in accordance with NPTC for herbicide spraying
- Adjustable boom height
- Robust yet lightweight frame
- Easy to attach and remove

Order Code: OAI001987

iGO Spray Lance

Simply connect the spray lance to the iGO to mark penalty spots and ground under repair (GUR). Also useful for spot treating weeds, localised disease infection or Dry Patch.

- Easily connects to iGO spray machines
- 2.5 metre length transparent hose
- Trigger action with locking feature
- Integral spray nozzle filter
- Robust yet lightweight frame

Order Code: OAI002015

Armaline Ride On Attachment

Especially developed for use with the Impact line marking paint system, Armaline is THE operational cost-saving solution for multiple pitch markings and available for use on a wide range of utility vehicles.

- Fast-fix, clamp fitting
- Locking, retractable arm for ease of operation and transportation
- 3" and 4" interchangeable line width options
- 12v diaphragm pump for consistent paint output
- Easily removed 20 amp battery for charging on or off the vehicle
- Ergonomic 'Ski' design for sliding over rough terrain
- Solenoid spray head valve ensures instant cut off of paint
- Simple two way valve wash option for cleaning nozzles between sites

Order Code: OAI001511
