

4Tetra

100% Tetraploid perennial ryegrass blend

Double the number of chromosomes makes tetraploid perennial ryegrasses high vigour, extremely stress tolerant plants. Increased cellular chloroplast boosts chlorophyll production, aiding energy absorption and processing. The outcome is a robust, hard-wearing, healthier plant with advanced establishment and recovery capability, even in colder temperatures down to 4°C. Stronger, deeper, denser root mass supports tensile strength, drought tolerance and recovery.

Usage

- Natural grass and hybrid sports pitches
- Playing fields
- Racecourses
- Golf tees, fairways, semi-roughs and walkways
- Cold temperature seeding down to 4°C

Performance

- High energy seed with fast germination from just 4°C
- Increased chloroplast boosts chlorophyll and energy production
- Superior winter wear with robust, upright re-growth
- Stronger, deeper, denser root mass for tensile strength and drought tolerance
- Exceptional tolerance to Leaf Spot, *Microdochium* Patch, Red Thread and Rust
