

R117

Fine fescue blend

This high density, balanced blend of fine fescues increases salt and Red Thread tolerance.

Cultivars

25% Bogart: Chewings fescue

Very high shoot density and excellent tolerance to Red Thread disease

25% Greensleeves: Chewings fescue

High shoot density, good winter colour, early spring green-up, high salt tolerance for the species

25% Absolom: Slender creeping red fescue

Best in class for visual merit and excellent tolerance to Red Thread disease

25% Beudin: Slender creeping red fescue

High shoot density, consistent mid-green colour summer and winter

Usage

- Golf and bowling greens
- Free-draining golf tees and fairways

Performance

- Increases density and salt tolerance
- Withstands regular close mowing down to 4mm
- Improves tolerance to Red Thread disease
- A balanced blend giving early spring green-up and recovery

Pack Size: 20kg

Order Code: OAI000849

Turfgrass Seed 2023	Shoot density	Red thread	Visual merit
Bogart	7.6	6.9	7.7
Greensleeves	7.4	6.8	7.3
Absolom	7.1	7.8	7.7
Beudin	7.4	5.0	7.5

Sowing rate	Overseeding rate	Sowing depth	Mowing height
20 – 30g/m ²	10 – 20g/m ²	4 – 8mm	Down to 4mm
