Hard wearing 100% perennial ryegrass blend with Tetraploid Technology

With robust tetraploid perennial ryegrass, this hard wearing, well-balanced blend grows and recovers in colder conditions. Deep, dense rooting provides improved tensile strength, heat and drought tolerance. Tetraploid seed is higher energy than ultra-fine ryegrass, providing rapid germination and re-growth from just 4°C, especially useful when renovation windows are short and for in-season repairs.

## Usage

- Natural grass and hybrid sports pitches
- Playing fields
- Racecourses
- Mid-season overseeding
- Cold temperature repairs
- Increasing disease, drought and heat tolerance
