Hard wearing 100% perennial ryegrass blend with Tetraploid Technology

Double the number of chromosomes makes tetraploid perennial ryegrasses high vigour, extremely stress tolerant plants. Increased cellular chloroplast boosts chlorophyll production, aiding energy absorption and processing. The outcome is a robust, hard-wearing, healthier plant with advanced establishment and recovery capability, even in cooler temperatures down to 4°C, a distinct benefit any time of year. Stronger, denser root mass supports tensile strength and drought tolerance.

The Mixture

25%	Fabian	Tetraploid perennial ryegrass
25%	Tetrastar	Tetraploid perennial ryegrass
