R314 Rye

Cold temperature ryegrass repair

R314 Rye is the ultimate blend of quality amenity annual and tetraploid perennial ryegrasses that help keep surfaces fit for use throughout the cold winter and early spring months. New, darker green cultivar Quickston annual ryegrass germinates from just 3°C supported in R314 Rye by tetraploid perennial ryegrasses which germinate from just 4°C. The blend is not only unrivalled for cold temperature recovery but also offers longevity through 70% tetraploids which provide tensile strength, drought and disease tolerance and recovery after wear going forward.

The Mixture

30%	Quickston	Amenity annual ryegrass
35%	Fabian	Tetraploid perennial ryegrass
35%	Tetragreen	Tetraploid perennial ryegrass

Sowing Rate: 40-60g/m²
 Overseeding Rate: 30-40g/m²
 Sowing Depth: 12-15mm
 Mowing Height: Down to 12mm

The Cultivars

Quickston Germination from just 3°C, the ultimate for cold temperatures

Fabian Hard wearing, with germination from 4°C, high disease and drought tolerance

Tetragreen Germination from 4°C, strong, deep dense roots for tensile strength

TGS 2021	Wear	Recovery	Red Thread	Winter Green
Quickston	n/a	n/a	n/a	n/a
Fabian	5.8	5.6	8.0	7.6
Tetragreen	5.0	4.5	7.2	7.5

	Sport Index (Wear)	Establishment	Persistence	Colour
Fabian	7.0	7.8	7.9	6.4
	Leaf Spot	Microdochium	Red Thread	Rust
Fabian	7.2	7.9	7.9	7.7

Geves Turfgrass List

“ 2020 has been our first season trialling the effects of the Germin-8T coating on Rigby Taylor grass seed. The results were fantastic giving us quick germination, in optimum conditions this was sometimes under a week! We have trialled R1, R9 and R314 and have been impressed across the board. We look forward to using the seed mixtures as part of our regular overseeding programmes. ”

John Rowbottom, Woolley Park Golf Club, Woolley, West Yorkshire

Where to use

- › Tees and the general area, including fairways, semi-roughs and walkways
- › Cold temperature repairs for high wear areas

How it performs

- › High energy seed with fast germination from just 3°C
- › Increased chloroplast boosts chlorophyll and energy production
- › Superior winter wear with robust re-growth
- › Stronger, deeper, denser root mass for tensile strength and drought tolerance
- › Exceptional tolerance to Leaf Spot, Microdochium Patch, Red Thread and Rust diseases
