### R314 Rye

#### Cold temperature ryegrass repair

R314 Rye is the ultimate blend of quality amenity annual and tetraploid perennial ryegrasses that help keep surfaces fit for use throughout the cold winter and early spring months. New, darker green cultivar Quickston annual ryegrass germinates from just 3°C supported in R314 Rye by tetraploid perennial ryegrasses which germinate from just 4°C. The blend is not only unrivalled for cold temperature recovery but also offers longevity through 70% tetraploids which provide tensile strength, drought and disease tolerance and recovery after wear going forward.

#### The Mixture

|     |            |                               |
|-----|------------|-------------------------------|
| 30% | Quickston  | Amenity annual ryegrass       |
| 35% | Fabian     | Tetraploid perennial ryegrass |
| 35% | Tetragreen | Tetraploid perennial ryegrass |

Sowing Rate: 40-60g/m<sup>2</sup>  
 Overseeding Rate: 30-40g/m<sup>2</sup>  
 Sowing Depth: 12-15mm  
 Mowing Height: Down to 10mm

#### The Cultivars

|            |   |
|------------|---|
| Quickston  | Germination from just 3°C, the ultimate for cold temperatures               |
| Fabian     | Hard wearing, with germination from 4°C, high disease and drought tolerance |
| Tetragreen | Germination from 4°C, strong, deep dense roots for tensile strength         |

| TGS 2022   | Wear | Recovery | Red Thread | Winter Green |
|------------|------|----------|------------|--------------|
| Quickston  | n/a  | n/a      | n/a        | n/a          |
| Fabian     | 6.4  | 6.6      | 6.1        | 6.5          |
| Tetragreen | 5.0  | 4.5      | 7.2        | 7.5          |

|        | Sport Index (Wear) | Establishment | Persistency | Colour |
|--------|--------------------|---------------|-------------|--------|
| Fabian | 6.9                | 7.5           | 7.8         | 6.4    |
|        | Leaf Spot          | Microdochium  | Red Thread  | Rust   |
| Fabian | 6.6                | 7.9           | 7.9         | 7.7    |

Geves Turfgrass List

“ 2020 has been our first season trialling the effects of the Germin-8T coating on Rigby Taylor grass seed. The results were fantastic giving us quick germination, in optimum conditions this was sometimes under a week! We have trialled R1, R9 and R314 and have been impressed across the board. We look forward to using the seed mixtures as part of our regular overseeding programmes. ”

John Rowbottom, Woolley Park Golf Club, Woolley, West Yorkshire

#### Where to use

› Tees and the general area, including fairways, semi-roughs and walkways

› Cold temperature repairs for high wear areas

#### How it performs

› High energy seed with fast germination from just 3°C

› Increased chloroplast boosts chlorophyll and energy production

› Superior winter wear with robust re-growth

› Stronger, deeper, denser root mass for tensile strength and drought tolerance

› Exceptional tolerance to Leaf Spot, Microdochium Patch, Red Thread and Rust diseases
