

KATOUN[®]GOLD

MAPP 17879

Application Equipment Advice

Katoun Gold should be applied with twin even spray 0.15 green nozzles and a regulator.

The twin nozzle assembly only fits directly onto the lance elbow so the regulator should be fitted at the handle end of the lance.

These regulators are only available for the Berthoud or Cooper Pegler lance and are specific to each make of Knapsack.

Berthoud Lance

Cooper Pegler Lance

The illustrations above show the correct assembly of the equipment

This combination will deliver 710mm in 1 minute.

225 Litres per hectare will be applied at a walking pace of 3.8 kph (1m per second).
