

# In line for top marks!

Introducing the  
**iGO Prime** and the **iGO Midi**

# Two new machines join the iGO range of spray line markers

Leading the industry with its awarding winning Impact paints, Rigby Taylor is adding two new and innovative marking machines to its highly successful **Glider**, **iGO Advance** and **iGO Mini** spray line marking range.

The **iGO Prime** and **iGO Midi** both feature an innovative, functional *Circulatory Paint System*

New features on the iGO Prime and iGO Midi

Easy Prime/Spray valve located at the rear

Clear protective plastic tube over disc lifter cable

See back page

Twin probe paint circulating system for internal paint dispersion

Safety handle bar grip-end plastic inserts to protect from knocks

Adjustable stop bracket to lock in place preferred height adjustment

## **iGO Prime**

- Innovative** - twin probe paint circulating system for internal paint dispersion
- Simple** - easy Prime/Spray valve located at the rear
- Protection** - handle bar and front-end extension tubes helps reduce water penetration of the chassis - clear protective plastic tube over disc lifter cable
- Safety** - handle bar grip end plastic inserts to protect from knocks to the handles
- Adjustable** - stop bracket on the spray head tube to lock in place preferred height adjustment
- Powerful** - Six hours constant spraying from its 20 amp power unit.

## **iGO Midi**

- Innovative** - twin probe, paint circulatory system of internal paint dispersion
- Tough** - robust high-gloss 'warm touch' powder coated framework
- Compact** - easily portable and highly maneuverable
- Powerful** - six hours constant spraying from its 20 amp power unit

Using a single 10 litre drum of Impact ready-to-use paint, 8 pitches can be marked without returning to base

**ADJUSTABLE WIDTH SPACERS**  
Pre-drilled disc spacers for quick line width changes, front bumper bar protects nozzle assembly

**DISC LIFT\***  
Finger-tip control lifts and locks discs when applying staggered lines or moving from one pitch to another

**LED INDICATOR\***  
Battery charge indicator shows at a glance when battery requires charging

**SOLENOID VALVE\***  
Allows immediate cut-off of spray. Eliminates paint leakage and dribbles on the pitch

**PNEUMATIC TYRES**  
Provides excellent stability and maneuverability. Provides smooth ride over all surfaces

**HEAVY DUTY PUMP**  
Easily accessible, pump provides consistent spray output

**POWER SWITCH**  
Simple on-off push-button for instant control of paint delivery

**RECHARGEABLE BATTERY**  
Battery can be charged on the machine or simply removed for off-site charging

**ADJUSTABLE HANDLEBARS**  
Easily adjustable for operator preference and comfort

## The Circulatory Paint System

### › Continuously re-circulates paint for consistent spraying

This innovative system continuously re-circulates paint during operation, improving flow to help sustain a consistent spray, particularly useful in cold conditions.

### › Easier machine cleaning after use

Immediately after marking, both probes are placed in clean water and the re-circulate function is activated for a few minutes to clean the internal system. An added advantage is a probe can then be used to wash down the machine externally.

## Impact PAINTS

The award-winning Impact range of ready-to-use paints offers a choice of formulations for use on a wide range of surfaces: natural, hybrid and synthetic grass, and hard surfaces including tarmacadams and concrete.
