RT

Enclean on signs, street furniture

Untreated

140 DAT

270 DAT

RT

Contact only – note shade from leaf

Stencil of leaf –
moss not
treated so will
not be
controlled

If large amount of detritus and other materials masking areas to be treated good practice to blow area prior to application

Slip Hazard in Car Park

Area sprayer early morning after frost and cold conditions – followed by warmer weather and sunny conditions results were showing in 6 hours picture taken 5 days later

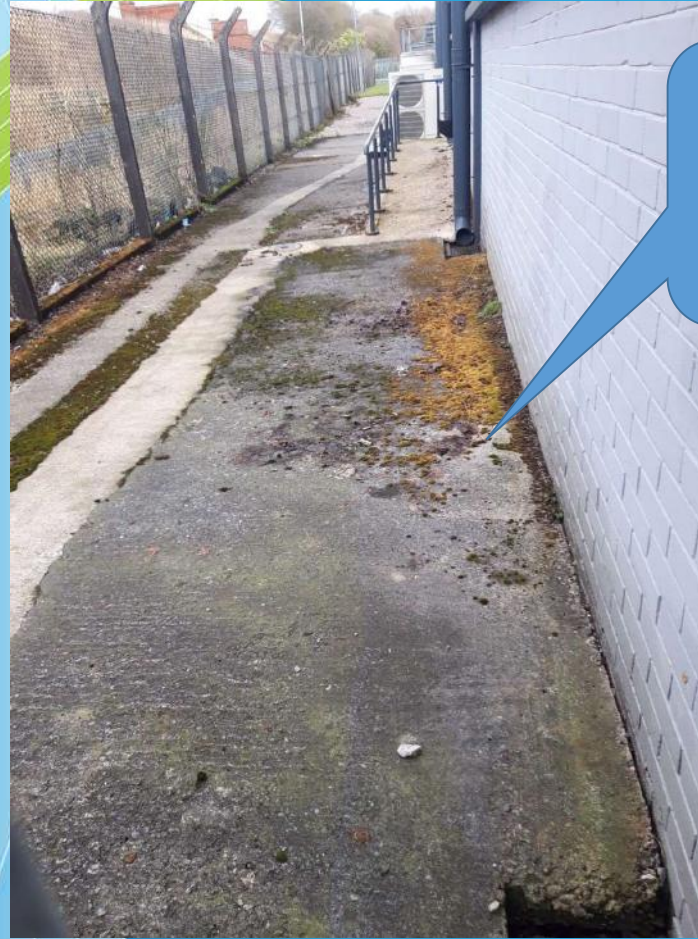

RT

Industrial Areas

Slip hazard – Emergency
Exit

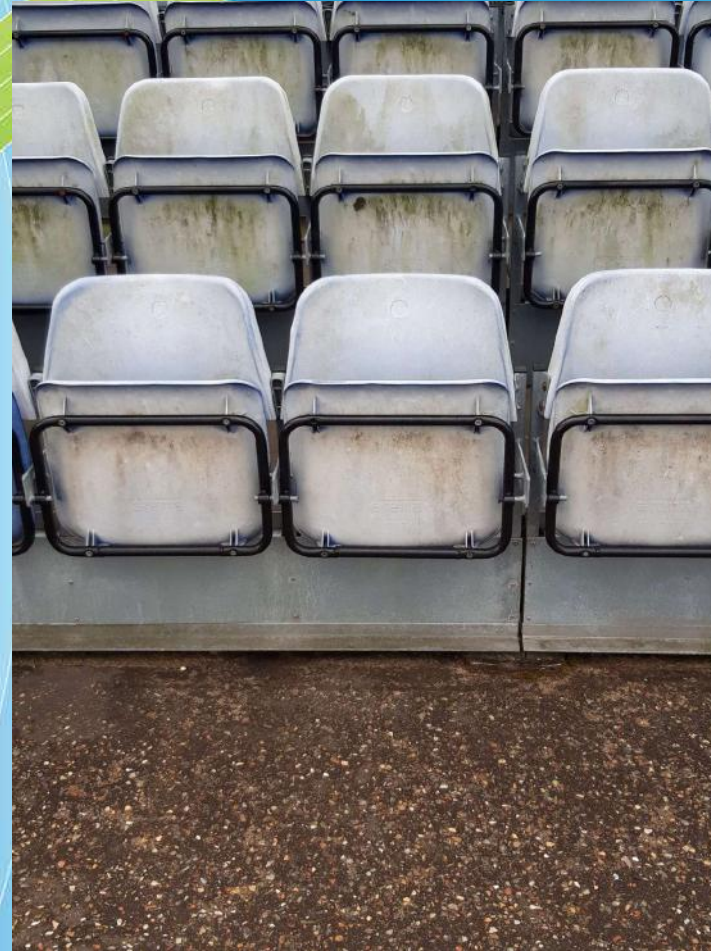

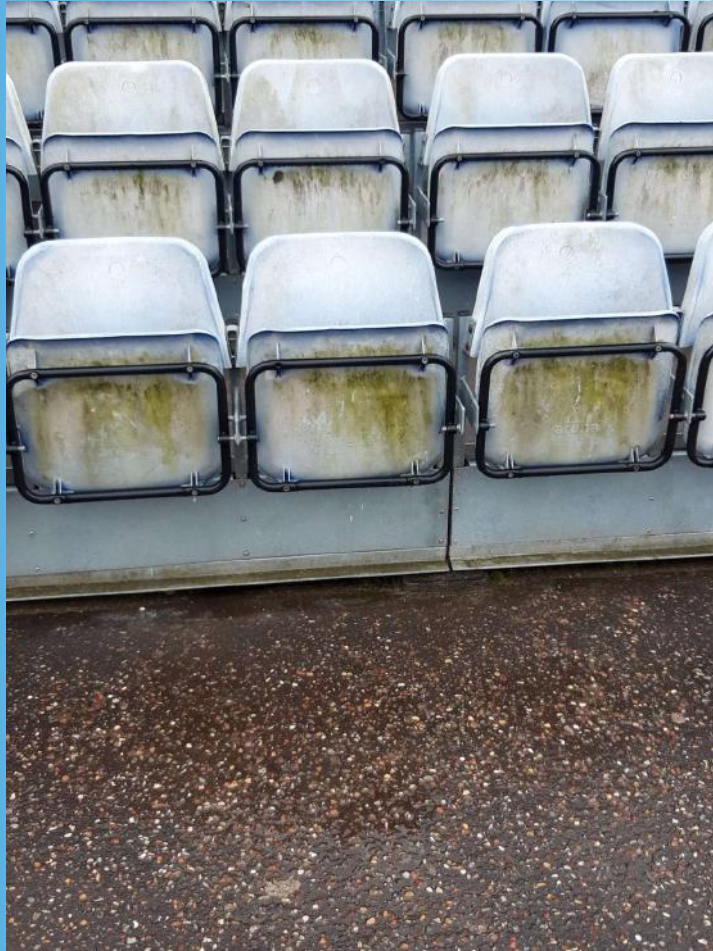

One spray bout applied
picture taken next day

Stadiums seating areas

Picture taken only 5 days after application to front seats – black algae will fade and wash off with natural rainfall and be controlled after 3 weeks

Spraying takes a few seconds
pressure washing expensive and very messy

Block Paving

Applied after
frosty morning
Treated picture
taken 5 days

Remember

If high levels of
established weeds
add Glyphosate to
Enclean spray will
then control all
weeds and moss in
one spray costing
less than 12p/m²

RT

Artificial Surfaces – various situations

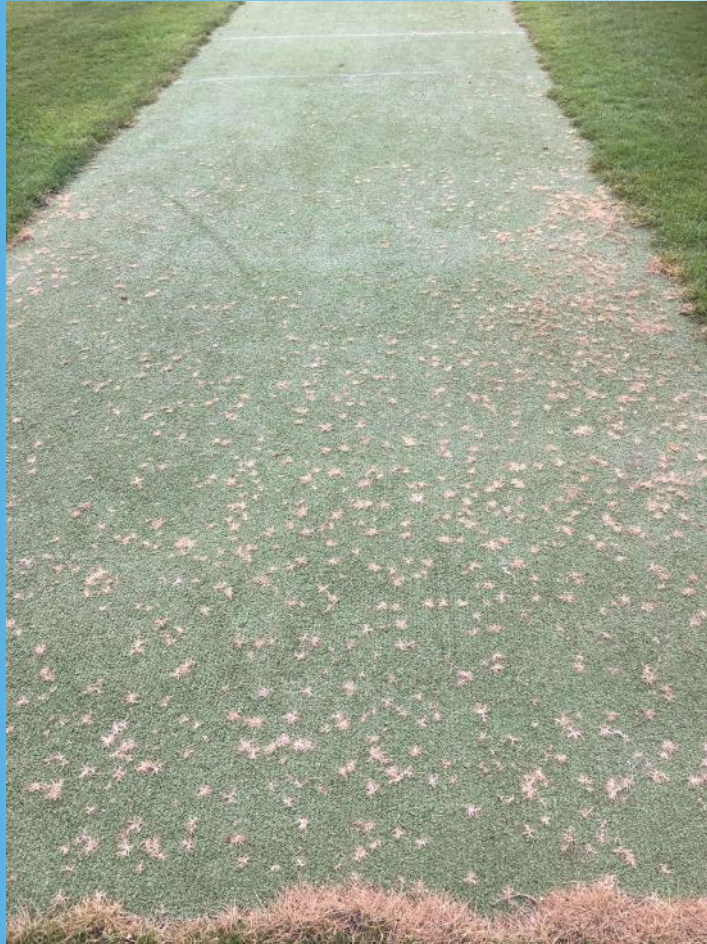

Golf Areas – netting artificial surfaces

Artificial Cricket Wickets -

Enclean will control grasses along edges of wicket

HINT Use Shield to get straight edge or if encroachment is greater tank mix glyphosate with the Enclean still use shield to get straight edge

Treated- weeds
and moss now
controlled

Untreated

RT

Garden Areas — two days after treatment

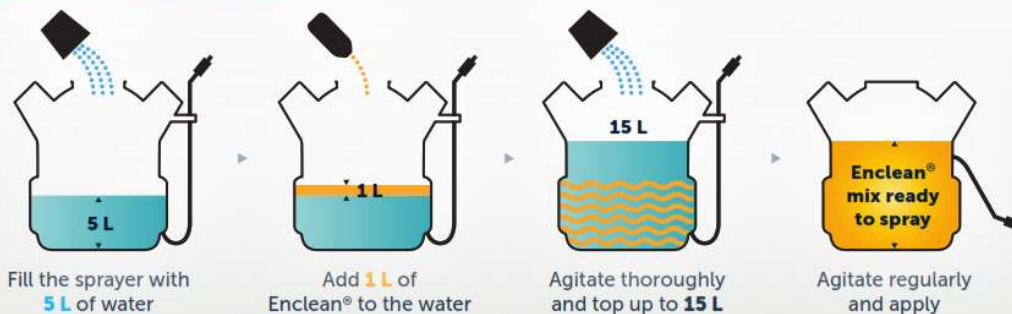

Easy Clear Application Rates

- Apply 1.8 ml of Enclean per sq m of hard surface (in 27ml of water sq m)
- 1 litre of product plus 14 litres water treats 555 sq m in 15l knapsack

Usage instructions

(example for a 15L knapsack sprayer)

Apply using a Red 0.4 evenspray nozzle
15 L of mixed solution to cover 555m²

Please read the label before use and follow the instructions

Use correct Nozzle

- For smaller areas add 7.2ml of product to 1 litre of water to treat – 40 sq m
- Apply using red 80° flatfan 04 nozzle

Element to consider when selecting a Biocide

Things to consider ?

- Efficacy – plant origin
- Cost of goods per sq m
- Labour Costs - Ease of Application
- Correct nozzle
- Persistency
- Target problem
- Areas to be treated -

Enclean ticks all the boxes

- Proven in wide range of conditions
- Very cost effective only 10p sq m
- 5-10 times quicker to apply
- Use red Enclean nozzle
- Long term control
- Wide range of species controlled
- Any hard surface
 - Tarmac, pavements, stone, block paving
 - Permeable and non-permeable
 - Roofs, conservatories
 - Artificial Surfaces
 - Tarps, weather covers
 - Fencing, Timber cladding
